Turbo Wind Meter By Davis Instruments

A quality performance wind speed indicator with high tech design and exceptional accuracy for any location or application requiring precise measurement of low wind velocity.

Features:

- Wrist lanyard and Protective case
- Compact size: 1.16" x 2.6" x 4.65" and Light weight: 85g
- Measures in four different scales for versatility:
 - Miles per hour (0 – 99.9)
 - Knots (0 – 87.9)
 - Feet per minute (0 – 8790)
 - Meters per second (0 – 44.8)
- Sapphire jewel bearings and Infra-red speed sensor provide almost no friction allowing the the precision turbine to turn at a speed directly proportionate to wind velocity.
- Special high brightness red 3 digit display is used for extra resolution and provides excellent viewing contrast indoors or out.
- 1 year manufacturers warranty
- Battery powered – with battery saver feature
