Masterflex Peristaltic Pump

Masterflex® L/S® 12-VDC cabinet-style drive; 20 to 90 rpm. Versatile, portable drives run on 12 VDC input power – ideal for sampling and fluid transfer in the field. Sample depths down to 26 ft (7.9m); useful for field applications in wells, sewers, or lakes. Reversible 1/20-hp motor lets you purge tubing or sample containers before pumping, and pump fluid in either direction. Separate single-turn speed control and on/off/reverse switch maintain speed setting even after turning drive off.

Painted steel housing is IP21 rated for protection from dripping water and gentle spray. Color-coded banana plug/ screw terminals for power connections are circuit breaker protected. Attach your 12 VDC source directly or order adapters for easy connection. This variable-speed cabinet-style drive operates on 12 VDC input power.

Features :

- Max. flow rate – 520 mL/min
- Min flow rate – 1.2 mL/min
- 20 – 90 rpm
- Reversible motor
- Nominal Voltage – 12 VDC
